

The High-Grade Super Wide Solution

Highest print quality for Super Wide applications: Mara® Jet DI-V excels through brilliant colour shades with wide colour gamut, high colour density, excellent fade resistance as well as exceedingly fast drying times.

Furthermore, Mara® Jet DI-V offers best conditions for smooth changeovers thanks to its user-friendly, uncomplicated characteristics.

Applications

Mara® Jet DI-V was developed especially for printing machines employing Spectra Polaris / Spectra Nova, or similar print heads.

Owing to the high colour density even on textiles and flag materials brilliant prints can be achieved.

Substrate Range	
PVC self adhesive films	✓
PVC coated substrates	✓
Textiles	✓
Tarpaulin materials	✓
